November 3, 2006

To Whom It May Concern:

After installing the Vortex XS-FLO on several buses with Cummins engines ranging from 1999 to 2001 models, we have accumulated enough data to satisfy our skepticism.

We have successfully tested the Vortex XS-FLO on four buses which increased fuel mileage by 1.075 mpg. With a fleet of 300 plus, that uses approximately 1800 gallons of fuel daily this could produce a substantial savings.

Thank you,

Mike Largin
