Pace Runners Inc. are a courier, cargo delivery, and warehousing company. They are located in Pelham, Alabama. They deliver to Alabama and the surrounding states. Pace Runners delivers anything from a 1 pound package to a loaded 24 foot body truck. They own a Mitsubishi box truck, an Isuzu box truck, 2 Ford F350 extended vans and a Ford Ranger pickup truck. All of their trucks averaged fuel savings of 11%. The exception was their Ford Ranger that averaged fuel savings of 18%. Pace Runners is very pleased with their fuel savings.

One of their contract owner operators has a 2001 Ford Ranger pickup truck. After the Vortex installation he delivered a 2 pound package to the telephone company in Macon Georgia. After the delivery he filled up his gas tank and drove back to Birmingham, AL. His speed averaged 75 to 80 miles per hour. He normally gets 225 miles per tank of gas; however with the Vortex installed he got 300 miles per tank of gas. That is an increase of 75 extra miles per tank of gas or a savings of 33%. In local driving he is averaging 20% fuel savings.

Yours Truly,

Edward Macaya
